

Infrastructure of St. Mary's CBSE School

St. Mary's CBSE School has been built in an area of 7,355 sq. metre area with four sided boundary wall. The main entrance is with a parking area which accommodates the school buses and staff vehicles.

Our school has a very big play ground where the students relax and practice a variety of sports events. There is a children's park beside the playground.

The school building consists of three storeyed buildings. There are two blocks with three storeyed. The class rooms are ventilated and spacious with smart boards.

There is a well furnished library have an array of reference books, periodicals and magazines which enhances the active learning among students.

Lab

In order to make the students to get deeper knowledge in the science subjects, we maintain a well equipped physics lab, chemistry lab, biology lab and a composite lab.

Computer lab

There is an air conditioned spacious computer lab in our school with enough computers to assist the students to compete with the present competitive world.

Robotics lab

Robotics lab has been planned to expose the students to the general functioning of a robot. Students will be trained on few general robots and they will be allowed to implement their skills learned in other labs such as AI and control lab to design special purpose robots.

School bus facilities are available for all routes to make the transportation easier. CCTV camera is fixed in all school buses.

We have installed CCTV camera in the corridor as well as in the class rooms to ensure the safety of the students.

Fire extinguisher is fix and is checked periodically.

Washroom and toilet facilities for students are set separately as per the requirements of in each floor.

Wellness room is maintained in our school and first aid is given whenever needed.
